

# UH-60A/L/M Black Hawk

# CRASH RESCUE

**TYPE:** Dual Engine Utility/Medium Lift Helicopter

**CREW:** 3 in normal conditions and 4 during combat

**PASSENGERS:** 11 troop seats

**LITTERS:** Up to 6 litter patients

- On the UH-60A/L, the battery is located in the cabin area behind the copilot seat. On the M model, the two batteries are located in the nose of the aircraft.

- To gain entrance to cockpit, turn door handle downward (clockwise for left side of aircraft and counterclockwise for right side).

- To gain entrance to cabin, turn door handle downward and slide door aft. If cargo/passenger door is jammed, break window and rotate emergency handle.

**\*NOTE:** Cockpit door jettison handle is located inside of door just below window. If cockpit doors fail to jettison, break window or windshield.

## **WARNING:**

In case of fire, the safest approach to the UH-60 is to the side at a 45-degree angle.
